

RockFLEET GSM

Your Best Asset for Managing Your Marine and Land Fleet

Track, monitor and communicate with your fleet — regardless of where they are.

Reliable Satellite and Cellular Tracking

RockFLEET GSM utilizes the Iridium Satellite Network and cellular networks, ensuring your team is always connected. Tracking intervals can be predetermined; every minute, or every 12 hours.

Rugged and Durable Design

Designed to withstand the world's most harsh conditions, RockFLEET GSM is the perfect tracking partner for those working in remote and high-risk locations. RockFLEET GSM's internal backup battery will last for up to 2 weeks, if external power fails.

Bluetooth Ability to Enable Messaging Functionality

RockFLEET GSM can connect to Bluetooth to enable advanced functionalities including messaging, generating distress notifications and device troubleshooting.

Designed for Permanent Installation

RockFLEET GSM is designed for permanent installation on ships, yachts, vehicles and other assets. The unit is waterproof, ruggedized, with a variety of mounting options to suit your needs.

"RockFLEET GSM and TracPlus are safety tools that give us peace of mind. The radio operator will always know where our crews are. If we become lost, we know we can be located." **John Jones – Mandurah Water Rescue**

Specifications

Dimensions	104mm × 58mm × 23mm (4.1" × 2.3" × 0.9")
Weight	350gm (12.34oz)
Connectors	3m cable, unterminated power, RS232 and inputs cabling
Inputs	Bluetooth, three configurable digital inputs, RS232
Outputs	RS232
Indicators	Status indicator LED
Sensors	GPS, Accelerometer, Thermometer, Power loss, Impact
Antennas	Built-in GPS, Iridium and Cellular (optional)
Satellite Network	Iridium SBD via 9602 short burst transceiver
Cellular Network	GSM (with optional cellular support)
Power Sources	External DC supply with internal Li-Ion polymer battery backup
